

THE SILVER WOOD

Premium Furniture Crafted with Aluminium

BAVANAM
ALUMINIUM FURNITURE

Vision

To innovate through people, process and technology.

Mission

To become the leading supplier of smart, progressive and value oriented housing, furniture and custom made interior solutions in India by 2022.

US: Furniture is ever evolving. Designs were once just functional, today it is about aesthetics, ergonomics, health, durability, climate adaptation and so much more. It is with this understanding and the recognition of a need for clever, futuristic designing that Bavanam was founded. Solely made of Aluminium, the designs are not only functional it is supremely durable, stunningly structured and perfect for tropical weather. Bavanam's process is a result of two years of dedicated R&D. It is a blend of the perfect material and integration of the best of technology with sourcing, designing and crafting.

Bavanam collaborates with Malabar Extrusions; a leading supplier of aluminium, to ensure smooth and consistent supply and continued research and development that allows for proactive design evolution. The high end vacuum powder coating process allows the designers to add a range of wooden, polished textures and finishes to the product.

The brand focuses on ready to use products as well as customized solutions to meet the individual requirement of the user. From design to complete crafting, Bavanam's strength is in seeing the client's expectations and delivering beyond those expectations.

Aluminum THE SMART CHOICE

We are always asked why we stepped away from tradition and chose aluminium and we always reply that it is the smartest decision we made.

Aluminium is strong yet light, it is corrosion and termite free hence maintenance free. It is extremely durable and easy to design with. The metal allows us a design range that includes wood finishes without having to chop down trees. It can be easily recycled or passed down to the next generation. We realize that as mankind moves to the future everything has to be earth conscious and resource aware and aluminium is the perfect metal to align our process with that belief.
